Col. Ver reports that de Leon has just come back from Davao while the men of Osmeña numbering about 300 are training with an American among them who went and if this is Larry Trackman. De Leon brought two samples of home made bombs — beer bottles with gun powder and a fuse.

We must track down the training camps and eradicate them.

Met with Father Blanco, the revolutionary priest. He seemed impressed with the crash program of employment with the calling the 600 biggest men employed in the Manila area and asking them to take five to ten unemployed laying Cavite, San Pedro Tunasan, Sta Lando, Tala Sapposanta Cerritos, the free trade zone and the sale of essential commodities without payment of tariff or tax if necessary; the agro-industrial state and the Magalang project under a private foundation; the Filipinas Foundation of the Ayalas.

Have asked Sec. Malcolm to start the housing project immediately with the DPP, PHB, BOI & ESS contributing one million pesos each.

Hope to be able to start some community projects soon.
