7:40 P.M.
Written while waiting for the dinner conference to begin.

I am now reviewing the different programs that we have given priority to in relation to the budget and the four-year development program:

1. Land reform in relation to the 4-yr agricultural program
2. Agricultural cooperatives
2. Electrification
3. Vocational and agricultural education — so that every high school graduate may have a vocation to which they are academically prepared but not vocationally.
4. Medicare
5. Cooperatives in general (credit and consumers)
6. Infrastructure
7. Hospital & medical

I am computerizing the budget and systematizing the treasury. The income of government is theoretically steady but the cash book is uneven. It is highest during the payment of income taxes in April and August and lowest in between. So I have included in the next special session the bill requiring quarterly payments of corporate income.

I am also projecting the military installations development program to twenty years.
