Warm and humid unbearable in the golf course at Aguinaldo. Must have been 110° under the sun at one o'clock. But the temperature went down with the sun.

Have just come from a Sukiyaki party at Ruby Cuenco's (President of the Construction Development Corporation of the Philippines which built the North Diversion Road and the South Super-Highway and heads the Resort Hotels which has taken over Tagaytay Lodge, Corregidor and Pines Hotel in Baguio.

We studied the plans for these resorts. The hotel in Pagsanjan and Banaue are now finished. But we must improve the transportation in Corregidor and Bataan.

Stayed up to about 2:00 A.M. last night talking to Imelda about a certain Pat who has scandalized Washington with her story that when she was seventeen she was the girl friend of Pres. Johnson and that she also went to bed with an Asian head of state. The girl secretary, pretty and young was never alone with me long enough to have been made love to - And you do not touch the mistress of a man you want favors from. But Imelda says she does me enough to know that I have been faithful to her although she also says she would not feel too jealous but just concerned if I should be involved in flaming relations with another woman. She even says she loved me so much she would not be jealous provided she would not be scandalized. But now she feels she would never try it. And I certainly will not be unfaithful to her.
